

INFOMATRIX 2011

INTERNATIONAL INFORMATICS PROJECT COMPETITION

HONG KONG REGION TRIAL

Introduction

InfoMatrix, the International Informatics World (Programming, Computer Art, Hardware Control, Digital Content and Robotics) Project Competition, is a ground-breaking science fair open to secondary and university students. It is the largest science fair event of its kind world-wide. InfoMatrix is organized by the LUMINA Educational Institutions, with the support of the Romanian Ministry of Education Research Youths and Sports and the Group of Education of Mexico, with a mission to bring the world's best IT students together focusing on design, science, engineering, robotics and computer technologies in an effort to promote intercultural dialogue and cooperation.

InfoMatrix 2010 brought together over 1,000 brightest science like-minded students and their supervisors in Bucharest, Romania. Young scientists from more than 33 countries displayed their 390 science projects about pressing issues of computer art and technology, engineering, photography and robotics.
